

Monroe County COVID-19 Surveillance, Preliminary Data as of December 2, 2021

¹ Rochester Emerging Infections Program, Center for Community Health & Prevention, University of Rochester Medical Center, and Monroe County Department of Public Health(MCDPH), Analyzed by MCDPH

Number of COVID-19 Cases, Hospitalizations and Deaths, by Age Group²

Age group	Cases	Hospitalizations	Deaths
Age 0-4	2,682	60	
Age 5-11	6,356	29	
Age 12-18	8,268	70	
Age 19-29	19,473	409	*
Age 30-44	21,390	833	*
Age 45-59	18,668	1,471	75
Age 60+	18,359	4,640	1,416
Total	95,196	7,512	1,506

*Suppressed to maintain confidentiality.

The table below shows the number of COVID-19 cases, hospitalization and deaths by race and Latino origin. Note: due to the surge in cases during November 2020 through January 2021, there were a large number of cases with missing information about Race and Latino origin.

Number of COVID-19 Cases, Hospitalizations and Deaths by Race/Latino Origin²

	Cases	Hospitalization	Deaths
White, not-Latino	44,102	4,305	1,147
Black, not-Latino	13,166	2,002	236
Latino	9,102	799	91
Asian not-Latino	1,868	163	20
Other Races, not-Latino	2,324	169	9
Unknown	24,634	74	3
total	95,196	7,512	1,506

*Suppressed to maintain confidentiality.

On the following page are age adjusted case, hospitalization and death rates by race and Latino origin. Age-adjusting rates allows us to make fairer comparisons among groups with different age distributions. Confidence intervals are shown in () in the graphics. Note that rate estimates for groups having fewer than 20 people may be unstable; values for those groups are not shown in the charts. Additionally, population figures were not available for “Other Race Categories”, so rates were not calculated.

Age-adjusted rates for cases, hospitalizations, and deaths, are highest among Black and Latino residents.
