Monroe County Influenza Surveillance
October 1, 2017 – April 28, 2018

This is a preliminary report of Influenza cases, hospitalizations and deaths. As of 4/28/2018, there were 7,357 laboratory confirmed Influenza cases (4,720 Flu A, 3 A & B and 2,634 Flu B) and 1,327 hospitalizations (includes community acquired and hospital onset infections).

Nineteen deaths have been reported to date (all adults).

---

Laboratory Surveillance

*Percent positive may be underestimated, one lab did not report its numbers this week

Laboratory Surveillance: Positive influenza tests are reported on the NY State Health Commerce System (HCS) by all diagnostic laboratories. The above figure shows the number and type of positive tests from Monroe County residents, and the percent of all tests performed that were positive for flu.

---

Emergency Room Surveillance

Emergency Room Surveillance: All 4 Monroe County Hospitals report to the HCS the total number of ED visits each day. Influenza-like illness (ILI) cases are those that have fever and respiratory symptoms as chief complaint.

---

Long Term Care Surveillance

Long Term Care (LTCF) Surveillance: Beginning October 1, 2017 - 32 Monroe County LTCFs are asked to voluntarily report ILI and flu activity each week.
