Monroe County Partnering to End the Epidemic

## **WORKING TOGETHER: ENDING THE HIV/AIDS EPIDEMIC IN MONROE COUNTY**

Monroe County Partnering to End the Epidemic (MCPEtE) is a goal-oriented community initiative consisting of seven objectives each with specific activities that align with the Governor's New York State End the Epidemic Blueprint Recommendations.

The community partners committed to MCPEtE include clinical Providers, non-clinical Agencies and Consumers in an effort to address the multifaceted needs of the HIV/AIDS community including prevention practices.

The MCPEtE initiative addresses such issues as promotion of HIV testing, linking people to care, helping people stay in care, transportation, prevention services, disparities in health care, housing, mental health and addiction services as well as embracing research in the areas of treatment, prevention and solutions to barriers.

Our MCPEtE community partners are as follows. A direct link to their web sites has been provided for further information on specific programs.
